

THE OFFICIAL PUBLICATION OF VDOIT TECHNOLOGIES PRIVATE LIMITED

November 01, 2021

## vPost

vDoIT Monthly Newsletter

Dear Valued Connections,  
Greetings from vDoIT Team!

IT services have transformed the workability of every domain in this fast-changing technological world by offering simple and convenient solutions. vDoIT is geared towards providing such solutions to its clients by addressing the difficulties they face.

## A NEW ERA OF ARTIFICIAL INTELLIGENCE

vDoIT's partner company Shoofly is the perfect solution for your business to empower you to leverage Artificial Intelligence. Its global team has decades of experience with AI, Data Science and emerging technologies. It is our mission to help your organization differentiate, grow and evolve with our solutions.

Shoofly builds a complete roadmap for data architecture that is focused on quality standards. It uses a powerful approach for modeling that brings adaptability, predictability & consistency. It gives customers both expertise and choice with pre-trained models ensuring that the solutions are quick, scalable & easy to use. It aims to integrate & coordinate every aspect of the data ecosystem of a business, with real-time dashboard visualizations, linking everyone inside the company and everything.

Degree: Bachelor of Computer Applications

Position: Senior IT Associate

Specialization: Angular

**Name:** Siddhant Mishra

Degree: B.E. in Computer Engineering

Position: IT Intern

Specialization: Mobile Application Development

# INTERVIEW OF THE MONTH

We had some words with our Senior Technical Lead Mr. Hemant Shukla, who has just completed his one year with vDoIT.

## **Question 1. What's your favourite part about working with vDoIT?**

Kind of involvement with the team and specially with the upper management that I get here is the best in vDoIT. Also the liberty to explore as you want and the trust on the team in that is really encouraging.

## **Question 2. How do you prioritise your tasks?**

Currently we are using JIRA tool for task prioritization as a team, we also change the priorities as per the requirements through our internal meetings.

## **Question 3. What are your new learning in the past 3 months?**

Below are the key areas of my new learning in past 3 months:-

- Learning of TTN Server and Internet Of Things.
- Handling of Angular apps through Angular universal for SEO support.
- Hands on exposure with AWS for creation of Nodejs API's.

## **Question 4. What's the most challenging part in project you worked on?**

- Integrating TTN server with AWS for both uploading and downloading API's.
- Angular upgrade with angular universal from angular 7 to 12.

## **Question 5. Anything you want to share with the fresher angular developer?**

Key point that I would like to suggest any fresher is that before diving into any framework that is written in Javascript, please sharpen your Javascript skills first. Another thing is that instead of just trying to write the code, focus on understanding how things are working in that framework.

- Hemant Shukla  
Sr. Tech Lead

## CLIENT VISIT

Save Max Team Visited India

Save Max Real Estate Inc was established in 2010, is a Canada-based real estate company. vDoIT is associated with Save Max as a technological partner and is working on multiple projects. Recently, the Save Max team visited India, where we discussed new plans and they interacted with the vDoIT development team followed by a Gala Dinner.
