

**The Official  
Publication of  
VDOIT  
Technologies  
Private Limited**

Dear Valued Connections,  
Greetings from VDOIT Team!

In our fast-changing technological world, IT services have revolutionised the workability of every domain by providing simple and convenient solutions. VDOIT enables businesses to acquire the speed and quality of IT services they need to keep up with changing business demands.

# Glimpse of the Journey of VDOIT

---

I am very fortunate and thankful to lead the company VDOIT Technologies for last 7 precious years. Its hard to recall every learning of the journey but would certainly like to share few turning points of the Organization.

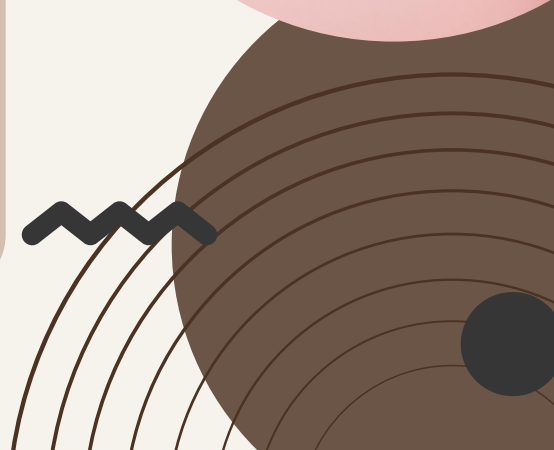

## Let's Start

March 15, 2015, when company got registered as VDOIT Technologies Private Limited we rented 500 sq ft office with 1 HR and 2 Programmers to develop a product - SpicyFi for Hospitality industry. We kept on evolving for few months but realized that Sales is the most demanding part of the investment, and we were not financially ready for that. We took another route of providing IT Services in providing solutions, staffing, consulting, and trainings. It was hard to even imagine the Profits for first 3 Years.

## Taste the Thunder

---

We took first few IT Projects of Govt. of India in 2017 starting in Healthcare, Education and Trainings. Even though we could not make much profit but deliveries of those projects which were envisioned to change the lives of people gave us tremendous confidence. A feeling of doubt on business continuity started fading. We also got the chance to meet then Health Minister of Govt. of India, Prime Minister of Vietnam, and many more renowned personalities in Public Sector.

# Roadmap

---

Innovation part of VDOIT is a central point today to get other businesses boosted in various segments. VDOIT is investing in advanced applications of technologies in Virtual Reality, AI/ML in all customer experiences, Auto Asset Management, Integration of anything, Business Intelligence, Robotic Process Automation and so on. We are committed to strengthen our current team with all possibilities and opportunities. We have plans to take company to at least double of its current revenue and team size in coming year.

## V are "A Team"

---

Idea behind the name of VDOIT was to convey the message that this organization is a Team, that's why name starts with V (Team) rather than I (Individual). Seeing company grow from 3 guys to 10 in 1 year, 35 in 3 years and 50 in 7 years has been a blissful experience. Hand picking the right (not necessarily the best) team members who have passion and hunger to do their Job has been a longer but a fruitful path for VDOIT.

# Maintaining a Unique Portfolio

---

VDOIT is one of its own kind of Organization with a unique portfolio having very different domains and much advanced technologies. Such portfolio got evolved by accepting challenges in solving multiple business problems of our clients.

VDOIT delivered a Blockchain based Talent Management platform at the time when no framework was stable. Solution developed by VDOIT was acquired by one of the biggest Talent Job Portal of UK – Jobtrees.com

VDOIT has been delivering in Sports Tech for last 5 years for our overseas clients and now we are preferred subject matter experts. Same way we are into Legal Tech, Audit Tech, Agro Tech, Edu Tech, Health Tech, Telecom, Real Estate Tech, E-Commerce applying our expertise in the areas of IoT, AI/ML, Cloud Solutions and many more advanced concepts and technologies.

VDOIT has been always committed to allocate sufficient budget for Innovation and Research in delivering optimal solutions to our clients.

## Always Thankful

---

I am personally very thankful to all our clients and partners in maintaining their trust in VDOIT in tough times like Pandemic in last couple of years. I am very thankful and grateful to all our employees, interns, and consultants to always adjust as per situations. Many thanks to their families to support them in making this journey of VDOIT as a Blissful Experience.

Thanks and Regards  
Narinder Kamra  
CEO, Co-Founder

# INTERVIEWS OF THE MONTH

**What made you consider HR as a profession?**

I enjoy interacting and working with people. An HR professional is one of the most respected person and an integral part of the organization, who knows all the in & out of the company. That's why I chose HR as my profession.

**GEETIKA MATHUR**  
HR EXECUTIVE

**What are your learnings at VDOIT so far?**

When I started working with VDOIT, I only had a basic understanding of HR work areas, but here in VDOIT, I have learned about every responsibility HR has. I also didn't have much experience with public speaking, but here, I had to give several group presentations, and as a result, I feel I have become much better at delivering information efficiently.

**What is the most challenging thing about being a backend developer?**

Nowadays everyone wants their application to be very responsive, fast, and secure. Being a backend developer the most challenging thing is to develop backend functionality with optimizations and keeping the eye on security issues.

**How do you keep updated on your technical skills?**

Learning new things every day from various resources that are available online and watching videos keeps me updated. Also, new challenges at work help me to learn new things and keep updated.

**Brief us about your learnings and journey at VDOIT.**

My learning and my journey with VDOIT is amazing so far. It is a great place to work. Here, I like the management and culture the most, with no red tape within the department and across multiple projects. Leaders, co-workers, and seniors are very supportive and motivating. Learning is the best part of the journey at VDOIT. Being a fresher, in a short time, I have learned a lot in terms of management and professional skills with great exposure to the real development environment.
